

My family and I would definitely be disappointed if we were unable to receive K-LOVE as a local station. I listen to it daily at home, in my car and at work. It encourages me during the day. It's nice when shopping in our small community that there are stores that have their radios on K-Love. In a worldly world today I like to have the opportunity to have a better choice of music. Our world is so going in the wrong direction that this keeps me on track and in tack with what as a Christina I believe.
